

Horizon Mobile Client (Android & IOS)

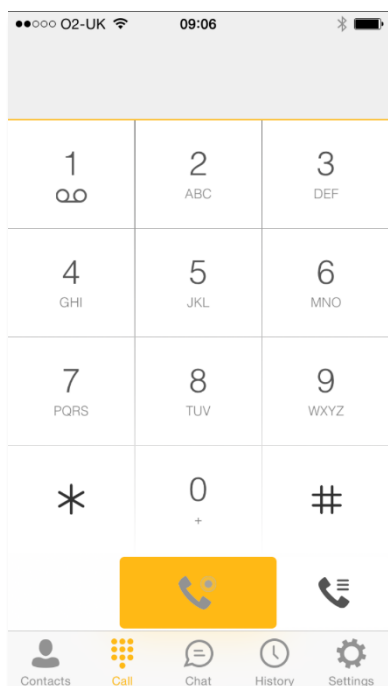

Bring the power of Horizon to your mobile device and access a range of features to ensure your colleagues and customers are always in contact.

The Horizon Mobile Client lets you connect your office phone to your preferred business device, such as a mobile phone or tablet. It works seamlessly with the Horizon service to ensure that you can control your user account and handle calls efficiently, wherever you are. The Horizon Mobile Client provides a new way to interact with Horizon and using existing devices you can reduce the cost of entry to a hosted solution, as well as minimising telephony costs incurred whilst on the move or in different locations and travelling abroad.

New features such as Presence and Instant Messaging add to the core Horizon services and provide an informed way of communicating with your colleagues, as well as giving you a new route to gain immediate responses when it might not be convenient to speak on the telephone.

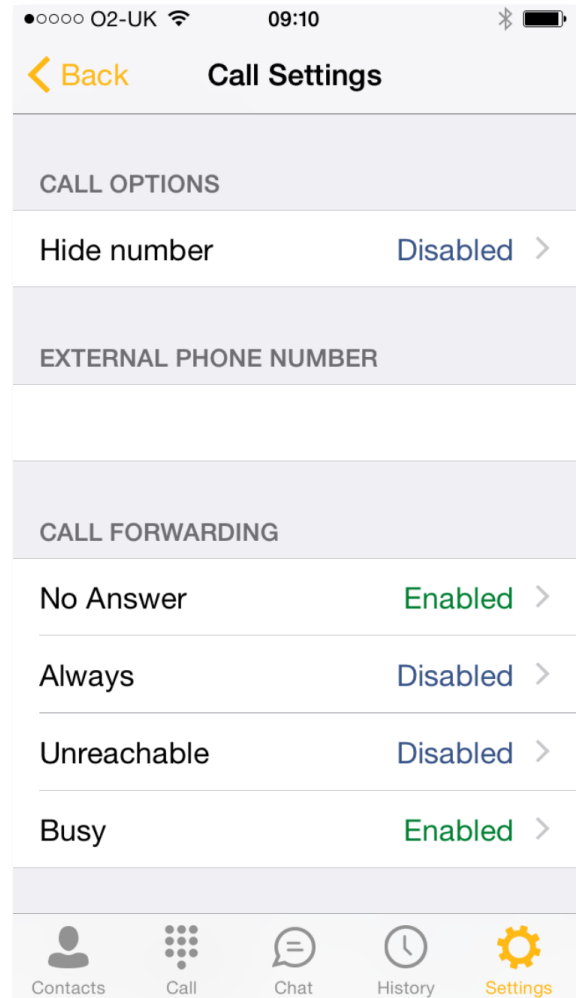

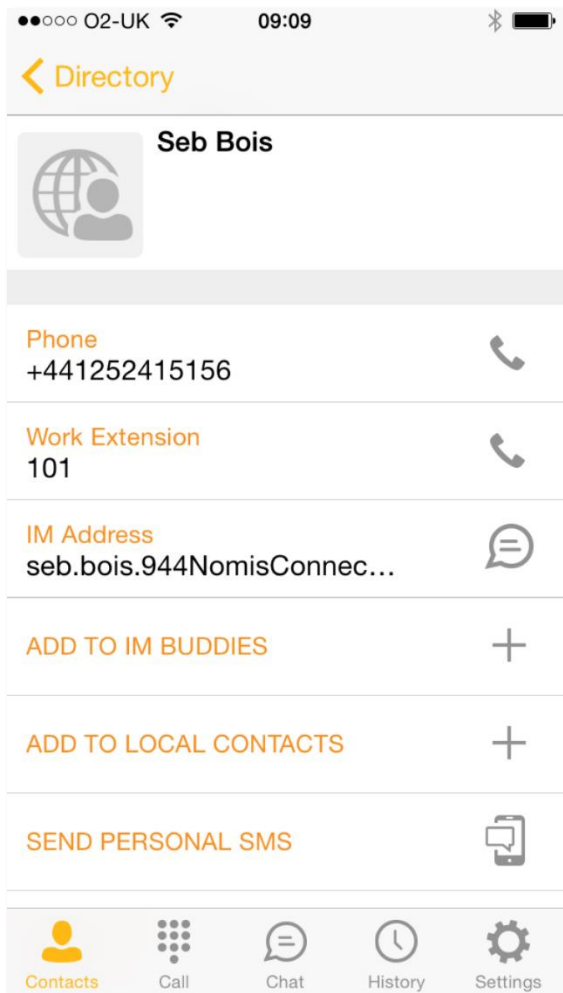

Using Horizon soft clients you can:

- Reduce the cost of entry to an IP hosted service by using the desktop client as a softphone and simply adding a headset
- Reduce telephony costs when on the move or in temporary access points such as hotels, coffee shops and customer premises
- Dramatically reduce call costs whilst travelling, by placing calls via the mobile app, these are charged as a call being made from the UK, rather than the higher international rate
- Send an Instant Message to get an immediate response from a colleague when their Presence status tells you it might not be convenient for them to take a voice call
- Directly control your user account to implement Call Forwarding, Do Not Disturb or other call features

Dial-pad

Clicking the dial pad will present the screen to the left. You can input a number as you would do if making a call directly from your mobile phone.

Directory

Horizon Mobile Client provides quick access to your colleagues contact details including IM;

- Ensures quick and seamless internal communication between staff
- IM provides another method of communication where it may not be appropriate to make a voice call

Access to Horizon Call Settings

Mobile Client provides access to your Horizon call settings 24/7/365, ensuring that when you're unavailable, you can forward calls to a colleague or voicemail to ensure vital calls are not missed.
